

# ENDURO CONVERSION VARNISH

**NON YELLOWING • INTERIOR OR EXTERIOR  
FULL CURE IN 7 DAYS WITH CATALYST  
RECOAT IN 1-2 HOURS • POT LIFE 6-8 HOURS**

## WHAT IS CONVERSION VARNISH?

GF Conversion Varnish is a post catalyzed, high solids, two-component urethane formulated for ultimate durability and chemical resistance. Use this wood finish for high-use projects that receive a lot of wear, such as bars, commercial tabletops, bathroom vanities, around dishwashers, kitchen cupboards or high-moisture areas.

# ENDURO PRE-CAT LACQUER

- NON YELLOWING
- INTERIOR
- SELF-CROSSLINKING ACRYLIC
- RECOAT 1-2 HOURS
- 21 DAY CURE

General Finishes water-based Pre-Cat Lacquer wood finish uses new technology in the polymer manufacturing process. This novel formula produces a smaller and smoother polymer particle, which translates into a big increase in film clarity. In addition, the chemical, water and yellowing resistance are superior to competitors, waterborne or solvent.
